This is a great investment opportunity considering the possibilities of the building, in which it is possible to build a total of nine multi-family homes, underground parking (with nine spaces and four storage rooms) and a 156 m<sup>2</sup> commercial area. It would be possible to build two additional levels: attic and basement.

The use is residential and there is already a construction project with a feasibility study, so it could begin to be marketed within a period of six months from its purchase....
